

Rewarding Innovation With Cash

Who we are

GGTC are a specialist organization that focuses entirely on helping clients to receive their entitlements to funding from Government for innovative product and process development.

- *We are the established market leader for handling R&D tax credit claims for SME clients. We also help large companies to optimize their entitlement under the scheme.*
- *Our success record is second to none.*
- *Our experience is that even though companies are claiming, 80% of the entitled claim value is missed.*

How can you benefit?

*Is your company missing out on significant cost savings and revenue opportunities?
You are likely to receive significant tax refunds if you can give positive answers to three simple questions*

- *Are you a UK based limited company?*
- *Do you pay corporation tax or PAYE on behalf of your employees?*
- *Have you innovated new or developed existing products or software, or engineering or manufacturing processes over the past two years?*

If your answer is yes to all three please [click here](#). We will contact you by return and qualify your entitlement.

We work on a no win no fee basis. Our investment is in you.
